

# KST EHP/EHP RC PUMP

High Pressure Electrical Pump for Injection of Grouting Material

## DESCRIPTION

**KST EHP** pump series belongs to the class of light-weight, high-pressure electrical pumps designed for successful remedial waterproofing. EHP pumps are built for their high efficiency and cost compared with other type of pumps or devices used to transport resins into area of repair.

**EHP RC** model is installed with a remote control to facilitate a one-man-operation.

## ADVANTAGES

- Able to power high pressure (up to 600 Psi) for best injection repair works.
- Electrically powered
- Compact in size (about 5kg)
- Detachable holding container for easy maintenance
- Can be operated by a single worker (RC - remote version)
- Electronic display for working pressure

## IMPORTANT NOTES

Any information and/ or specification contained herein is to the best of the company knowledge, true and accurate, it is always recommended that trial to be carried out to confirm suitability of use for all products, as no warranty is given or implied in connection with any recommendations and/or suggestions made by the company representatives, agents and/or distributors.

All information contained in this document is effective from date shown and supersedes all previous version. Please check with your local KENSETSU office to confirm that this is up to date version.
